Surviving the Evacuation, Book 18: Rebuilt in a Day Frank Tayell

Would you try to save the world? There is an evil cabal at the heart of government. For years it has bribed, blackmailed, and murdered in pursuit of global domination. In an attempt to destroy it, Tom Clemens rigged the presidential election. His candidate won, but the conspiracy wasn't stopped. Framed for murder, Tom is on the run. Searching for evidence of the cabal's plans, he is in Manhattan when the impossible happens. People attack one another. The victims die. They come back. Zombies. Uncertain who created the outbreak, but knowing it's connected to the conspiracy, Tom flees New York. As law and order breaks down, the undead spread throughout America. Tom searches for the scientist who might be able to stop the outbreak, unaware that the conspirators are searching for him. From *Surviving the Evacuation*, this is the story of Sholto, the beginning of the outbreak, and the people who tried to stop it. Please note: As the President of the United States is a background character, and the presidential election a background event, American English has been used in this book though with some British spellings in deference to the fact that most of *Surviving the Evacuation* takes place in the United Kingdom.

Blood Type Infected 1 Frank Tayell

Two deaths could be an accident. Three must be murder. 2039, twenty years after the Als went to war, plague and famine has reduced the global population to a hundred million. Most of the planet is a wasteland, with only a handful of enclaves preserving a dim shadow of civilisation. Technology has regressed to the era of steam trains, telegrams, and sailing boats, but democracy survived and is again under threat. Three terrorist insurgencies have swept across Europe, pillaging farms, burning villages, destroying two decades of fragile

recovery. Those refugees who escaped the massacres fled to the coast. Like a century before, Calais and Dunkirk have become the front line. On the home front, rationing continues, and another ice-age winter has begun. Christmas is only days away, but Constable Ruth Deering's mood is anything but festive. In the walled city of Dover, a lonely chef is discovered dead, poisoned. What first appeared to be an accident is soon suspected to be the work of a serial killer who is certain to strike again. On the front line, Henry Mitchell doesn't view this as war, just another crime against humanity during the twenty-year-long battle for survival. As hastily built bastions are fortified by a conscript-militia, Mitchell ventures deep behind the lines, hunting for the mastermind responsible for this latest assault. In the new British capital of Twynham, a peace treaty with the separatist kingdom of Leicester is in peril. Until it's signed, the soldiers laying siege to the royalist redoubt can't be redeployed to the front. As rusting tanks are recovered for repair, as new regiments are raised, and spies are sent east, the nation prepares for a war that certainly won't be over by Christmas.

Strike a Match 2 Frank Tayell

The outbreak changed everything, but there are some bonds even the undead can't break. It's been six years since Pete Guinn last saw his sister, Corrie. He always hoped to see her again, but feared she was dead. When an elusive billionaire reveals Corrie is living under an assumed name in the Australian outback, Pete unquestioningly jumps at the chance of a reunion. But you can't win the lottery without buying a ticket, and billionaires don't do favours for free. Corrie is in hiding from her old employer, and from the Rosewood Cartel. Now that they've both found her, only a miracle can save the two siblings, and what happens in Manhattan can't be described as miraculous. What begins as a viral outbreak soon turns into an impossible horror. People are infected and die, only to rise up and continue transmitting the infection. Even as the army is mobilised, the virus spreads beyond the borders of the United States.

Nowhere is safe from the living dead. As Australia is quarantined, the mining town of Broken Hill becomes a transit hub for the relief effort. Tourists are evacuated while civilians are conscripted, Pete and Corrie among them. Together with a bush pilot, a flying doctor, and an outback cop, the struggle to maintain civilisation begins. Supplies run low. Looting is rampant. Laws are forgotten, especially by the cartel who haven't abandoned their search for Corrie and their quest for revenge. Set in Broken Hill and beyond as the Australian quarantine begins. As this book returns to the beginning of the outbreak, it can be considered a good entry point for readers new to the series.

Over By Christmas Frank Tayell

A castle can be made safe from the undead, but not from the people inside the walls. It is seven months since the outbreak. In the anarchy and chaos that came with the undead, civilisation was destroyed. In the wars that followed, the planet was nearly ruined. Billions died. Only a few thousand survived. Fifty people have found refuge in the Tower of London. Zombies plague the city outside the old fortress. The wasteland beyond is filled with nothing but radioactive ruins. With nowhere left to retreat to, and in a final attempt to make the ancient castle a place where they can do more than just slowly starve, the survivors search for food in the abandoned coastal farms. They find something else. They discover that hunger, thirst, and the undead aren't the only threat they face. Betrayal and danger lurk in the shadows in this, the sixth novel in the series. Surviving the Evacuation Frank Tayell

Not all people died. Not all gave up hope. The outbreak was in February. By the end of November, Earth has become a hellish wasteland ravaged by the undead. Survivors from across the Atlantic seaboard took refuge on the Welsh island of Anglesey. Beset by dangers from within, they departed to establish a new refuge in Belfast. Not all of them arrived. Six took the last plane on its last flight, but crashed in France. Expecting a sprinting battle through the ruins of Belfast, they packed light. With few weapons and barely any food, their chances of survival are slim. The chances of rescue are slimmer. There was no evacuation in France. No quarantine. No rationing. But there are zombies, and there are people who believe they, alone, are the last survivors of the old-world. So begins a frantic race against the undead, through the snow and storm ravaged ruins of Northern France.

Though the apocalypse has begun, the reckoning is still to come. When Pete Guinn went to Australia to find his missing sister, he left behind the woman he loved. In the city he once called home, panic and chaos arrive long before the living dead. As South Bend burns to the ground, Olivia flees, seeking safety in the remote woods of Michigan. But the backwoods are no safer than the outback, and nowhere is remote enough to escape the horrors of the living dead. With global communications systems fractured, Pete Guinn and his sister, Corrie, are a small part of a large effort to re-establish contact between the forces still fighting the undead. As they journey east across Canada, they instead find the frontline. An army is being formed out of Canadians and refugees from the United States, out of retirees, reservists, and conscripts. Night and day, a war is waged against an enemy that doesn't tire or retreat, ask for quarter or offer it. But victory is in sight. The undead can be defeated. As long as the supply lines are maintained. As long as the ultimate sacrifice is selflessly made again and again. As long as the worst of the apocalypse is behind them. But though the apocalypse has begun, the reckoning is still to come. Set in Canada and the U.S. Midwest, continuing the story of the survivors in the Pacific, which began in *Outback Outbreak*, *No More News* is a story of love and war as the apocalypse tears our world apart.

Endangered Nation Frank Tayell

Surviving is easy. It's the next part, living, that's hard. Zombies. It is seven months since the outbreak. The world is in ruins. Britain is a radioactive wasteland peopled

by the undead. The few survivors cling to the hope that they might wake up tomorrow. For most, that is all they have left. But Nilda has something more; the chance that her son is alive. At least he was, months before. She and Chester set out from Penrith, searching for her son. During the journey, Nilda learns more about this self-confessed criminal, Radio Free England, the conspiracy behind the outbreak, and how Chester was involved in it all. As they near Hull, she realises it is too late to change her travelling companion. She will need his help to escape the zombie infested city, and find her son. Fleeing from the last remnant of the old government, Tuck and Jay head south in search for survivors. When they rescue a wounded man, their quest becomes one for medical supplies. That leads them to a rooftop city, and to the realisation that surviving out in the wasteland is easy compared to forging a new life from the wreckage of the old civilisation. The fifth novel in the Post-Apocalyptic series 'Surviving The Evacuation'. (100,000 words)

Wasteland Frank Tayell

Whoever wins the election, humanity will lose. Nine months after the outbreak, ten thousand survivors from across the globe have found a refuge on the Welsh island of Anglesey. Hordes of the undead ravage the wastelands of Britain and Ireland. Satellite images show that the rest of the world is no better. Food, fuel, and ammunition are running low and there are no more old-world supplies with which to replace them. Intended as an alternative to a slide into despotism, an election is called. It is hoped the contest will bring forth solutions to the myriad crises facing this last bastion of humanity. After the favoured candidate is hospitalised, suspicion falls on the new frontrunner, a publican who purchased his support with an impossible promise of a return to the pre-apocalyptic world. With no viable candidate, and no way of calling off the election, those who still have access to a ship plan their departure; others plan to rig the contest; a few give up on all plans for a future beyond tomorrow. Anglesey is on the verge of collapse, and humanity is on the brink of extinction. Set in Belfast, the Isle of Man, and Wales during the run-up to the election on Anglesey, this is the sixth volume of Bill Wright's journals. Createspace Independent Pub It is a week since the outbreak in New York. The president was betrayed. The vice-president is dead. The conspirators are close to victory. Having narrowly escaped agents of the cabal, Tom Clemens heads to Washington in the hope of

warning the president, but it is too late. The highways are impassable, filled with millions fleeing from the cities. As refugees storm the towns, and zombies fill the smoking ruins, survivors become more deadly a threat than the impossibly living dead. Still hopeful he can find the cause of the outbreak and so end it, Tom fights his way through an undead America, unaware that the cabal are searching for him. From *Surviving the Evacuation* this is the second part of Sholto's escape from a collapsing United States. His story continues in *Surviving the Evacuation, 1: London*.

Please note: As the President of the United States is a background character, and the presidential election a background event, American English has been used in this book though with some British spellings as most of *Surviving the Evacuation* takes place in the United Kingdom.

If not us, who? If not now, when? As the much-depleted United Nations meets in Canberra, the scale of the global catastrophe becomes clear. The tsunami left Brisbane a flooded ruin. Vanuatu has disappeared. The Madagascan evacuation has failed. Vancouver has been reduced to a radioactive crater. For as far west as Mozambique, as far to the east as Chile, and as far north as Canada, the world is a catalogue of devastation. From the Atlantic, there has been no news since the early days of the outbreak, four weeks ago. With the satellite networks down, searching for survivors is difficult. With the relief fleets destroyed, rescue is impossible. While the fallout is still settling, the collective minds of the refugees in Australia focus on rebuilding as a distraction from the rising risk of radiation and extinction. Commissioner Tess Qwong has a different duty. She must find those responsible for this ultimate crime against humanity. Her investigation into the failed coup provides the identity of those behind the outbreak and the location of their lab. With her misfit group of Special Forces and civilian conscripts, she heads to Mozambique. There, a New Zealand frigate will take them on into the unknown dangers of the Atlantic. But while they hunt the radioactive seas for the war criminals, below the waves their enemy is hunting for them. From Perth to Panama, from South Africa to South America, from paradise islands to radioactive wastelands, the battle against extinction continues. *No Future For Man* Frank Tayell The outbreak began in New York. Within days it had spread throughout the world. Nowhere is safe from the undead. As anarchy and civil war took grip across the globe, Britain was quarantined. The press

was nationalised, martial law, curfews and rationing were implemented. It wasn't enough. An evacuation was planned. The inland towns and cities of the United Kingdom were to be evacuated to defensive enclaves being built around the coast, the Scottish Highlands, and in the Irish Republic. For George Tull and the other residents of the Waverly-Price Retirement Home, walking to the coast is not an option. Abandoned by the staff, they wait for rescue. It doesn't come. When George leaves the illusory security of The Home and ventures into the nearby village, he finds it deserted. But he is not alone, his unhappy retirement is broken by the undead. George is left with a terrible choice; stay and fight to save the people he loathes, or leave and abandon the woman he has come to love. Other books in the series: 1: London. 2: Wasteland. Surviving The Evacuation, Book 8: Anglesey Frank Tayell

Fourteen months after the outbreak, thirteen months after the nuclear war, the old world is gone, but a new world is emerging. The evacuation of Britain failed, but other evacuations were a success. In Canberra, a new civilisation is being born, but in Canada, the survivors bid a last and final farewell to the Atlantic. While a final evacuation of Nova Scotia is planned, the search for lost communities begins. The journey takes Bill and Kim to the very end of the Earth, and to a meeting with familiar strangers. Crossing the border, Sholto endures a bittersweet return to the country he'd embraced so many decades ago. The United States he remembered is gone, and yet he can see its shadow among the burned ruins and desolate towns of the American Northeast. But the rains soon turn to a flood that washes away the few bridges not destroyed during the failed quarantine. With no other escape from the deluge, they take to the river. On the Hudson, they sail into the middle of a civil war. When they learn one faction is led by the last surviving member of the political conspiracy that spawned the apocalypse, it is obvious which side to take. Set among the thawing wilderness of Quebec and Ontario, the swollen rivers and flooded roads of New York, and in the courtrooms of Canberra, this novel includes characters and events from the five-part Pacific-based series Life Goes On. Here We Stand 1: Infected Frank Tayell Billions died during the global civil war

that followed the outbreak. Anarchy took grip. Chaos ruled. The world collapsed. In Britain, the evacuation failed. Nowhere was safe from the undead. Four months after the outbreak Bill Wright has found safety in a ruined Abbey in southern England, but he is still alone. All he has for company are the files sent to him by his shadowy contact, Sholto. On those, he believes he has found the origins of the undead, and the vast conspiracy in which he discovers he played an unwitting part. He needs answers, and knows the only place they will be found is at the facility that created the virus. As he journeys through the desolate ruins of a dead civilisation, he meets other survivors. He rescues some, is rescued by others, but ultimately discovers that zombies are not the most deadly threat in an undead wasteland. This is the second volume of his journal. (76,000 words)

Anglesey became a refuge for survivors from across the world, but living in the shadow of a decrepit nuclear power station was always a precarious existence. There is only one destination for their final exodus from Britain, but Belfast won't become their new home. There are fewer undead on the island of Ireland, but their numbers still count in the millions. With farming impossible, with the weather worsening, with ammunition exhausted, desperation turns to despair. All seems bleak, but the survivors don't know how truly desperate their situation is. During the chaos that ensued after the calamitous election, they misjudged the evidence. Their true enemy is still among them, and that enemy is about to act. Set nine months after the outbreak, in Britain and the island of Ireland, when humanity is at a crossroads. Either all will survive, or our species will die.

Surviving The Evacuation, Book 6: Harvest Frank Tayell

For good or ill, the future has begun. After the outbreak came the nuclear war. The blasts killed millions. Chaos followed. Most of those unlucky enough not to succumb to starvation and disease joined the ranks of the living dead. Fleeing the impossible nightmare, ten thousand, from nations across the Atlantic seaboard, found refuge on the Welsh island of Anglesey. There, they should have been safe. There, they should have been able to rebuild. There, they were betrayed. Forced to flee once more, a hasty exodus was planned, but those plans were sabotaged. The survivors became scattered across the island of Ireland. Old-world supplies are scarce, hope is running out, and safety is just a memory. The snow has come, and though

rain will soon follow, winter has truly begun. In Dundalk, eight hundred survivors have occupied a local college, but the campus is too dispersed to defend. As they scour the snow-covered town for a safe route to the sea, they find signs of long-fled survivors and answers to a question they hadn't asked. In Belfast, the situation is increasingly precarious. There are saboteurs in their midst. As the investigation into their identity slowly progresses, the terrorists continue to plot. Rumours of a mutiny escalate into a riot, while an unseen clock ticks ever closer towards humanity's destruction. Set in Belfast and Dundalk, over three days that change everything.

Book 3: FamilyThe undead rose. Nations collapsed. Some people survived. Three months after escaping from London, Bill discovers the true extent of the global war that followed the outbreak. Most of the world has been destroyed, but though ruined farmland and abandoned cities are filled with zombies, there are other survivors and there is a safe haven, so he is told, in a small village on the Irish coast. Before he can go there, he must find and rescue the children. Then he will have to battle his way through the infected wastelands of England and Wales in the hope that their really is a boat waiting for them. Even then, his journey won't be over. When he is told of the sanctuary awaiting them, he also discovers that the scientist who created the virus escaped from New York. In order for any of them to ever truly be safe, Bill will have to head north to confront the man, discover the truth behind the outbreak and finally choose between his old family and his new one. This is the final volume of his journal. Zombies vs The Living Dead The outbreak began in New York. Within days it had spread throughout the world. Nowhere is safe from the undead. In 2019, the AIs went to war. Three days later, hundreds of nuclear missiles were launched. The electromagnetic pulse destroyed the machines, but the radiation and ensuing famine nearly destroyed humanity. By 2039, civilisation had regressed to the age of steam, but newer technologies were on the horizon. The future looked bright until the warlords swept through Europe. Villages and towns were laid waste, the few thousand people who'd hacked out a life in the continental wasteland were butchered. It was only when the barbarians reached the British garrison in Calais that they were stopped. And so, another war began. In Dover, life goes on. Food needs to be grown. Children need to be taught. For Ruth Deering, the city's newest police officer, crimes need to be solved. When an artist is murdered, an investigation begins that will take her far beyond the city's walls and, ultimately, determine the fate of their fragile democracy. Set in Britain and France, twenty years after the world we know was destroyed.

Zombies. The outbreak began in New York. Soon it had spread to the rest of the world. People were attacked, infected, and they died. Then they came back. No one is safe from the undead. As anarchy and civil war took grip across the globe, Britain was quarantined. The British press was nationalised. Martial law, curfews and rationing were implemented. It wasn't enough. An evacuation was planned. The inland towns and cities of the United Kingdom were to be evacuated to defensive enclaves being built around the coast, the Scottish Highlands, and in the Irish Republic. Bill Wright, a Westminster insider and an advisor to a future Prime Minister, broke his leg on the day of the outbreak. Unable to join the evacuation, he watched from his window as the streets filled with refugees. He watched as the streets emptied once more. He watched as they filled up again, this time with the undead. Then the power went out. He is trapped. He is alone. He is running out of food and water. He knows that to reach the safety of the enclaves he will have to venture out into the wasteland that once was England. On that journey he will ultimately discover the horrific truth about the outbreak, a decades old conspiracy, and his unwitting part in it. This is the first volume of his journal. (73,000 words)

There is always hope. Northern France is a frozen morass of mud and snow across which rampages a horde of the undead, a hundred million strong. That won't stop Chester Carson and his comrades. Seeking a way across the Channel, they make for the coast, unaware that Britain has been abandoned, Belfast is a ruin, and that radiation is seeping into the Irish Sea. If they knew, that wouldn't stop them either. They're on a quest to save their family, their friends, and humanity itself; failure is not an option. As they journey through war-ravaged ports and storm-wrecked beaches, a new truth becomes clear. The flotilla that found refuge on Anglesey wasn't the only group of sea-borne refugees to have survived the outbreak. There are other survivors. Some good, some evil, some just determined to do their duty no matter the cost. Danger lurks along the French and Belgian coasts. So do answers, and hope that humanity now has a future.
